A World of Fun and Learning

2023 **Educational** Toys

# About CONTIXO

Contixo was established in 2010 with the primary goal of becoming a leader in the development of children's educational products. With that in mind, our goal has always been in developing imaginative products that not only help educate, but also make that process fun and exciting. For more than a decade, Contixo has been designing award winning products that combine state of the art proprietary technology with creative and imaginative software applications, to produce some of the most sought after children's tablets on the market today. We continue to design our products with the goal of inspiring young children to learn and to expand their minds as they continue their educational journey with every lesson and game they play.

Our company focus will always be on the fundamental principals of family and developing products that allow parents to engage with their children and help them create personalized experiences with our interactive tablets and toys. We believe that every interaction with a Contixo toy sparks a new idea, a new adventure, that helps children expand their universe, giving them greater passion for what comes next.

Now, more than a decade later, Contixo products are sold throughout the world. You can find us online at Amazon, Walmart, BestBuy, Target, QVC, HSN, as well as on shelves everywhere. You can also purchase our products here on our company website. Whichever product you choose for yourself or your child, we are sure that it will bring the same level of fun and excitement that we have committed to in developing it.
